

VIKAS TOOL MART

CROS User Guide

Customer & Reputation Operations System

Daily Workbook · Order Worklist · Complaints · Dashboard

For CRE Executives, Department Heads, and Admins

Prepared by Sirah Digital

What is CROS?

CROS is Vikas Tool Mart's cloud system for the Customer Relationship (CRE) team. It reads your live WooCommerce store to fill in daily numbers automatically, lets you work the day's orders with one-tap actions, tracks complaints, and gives leadership a real-time dashboard. It works in English and Tamil, and is built for phones first.

The one idea that makes it fast

Reduce manual entry - but keep it always possible. Anything the store knows is auto-filled; every auto value can still be edited by hand, and the app works fully even if sync is off.

Roles at a glance

- CRE - Daily Workbook, Order Worklist, log Complaints, own Reports.
- Head - everything a CRE can do, plus the Management Dashboard, all complaints, and summaries.
- Admin - everything, plus configuration: users, WooCommerce, KPIs, tasks, and channels.

First-time sign-in

Use the credentials your admin shares. Change your password after first login. Tap EN / தமிழ் any time to switch language. If you forget your password, an admin can reset it from Admin ' Users.

1. Signing in

Open the app URL on any phone or computer and sign in with the email + password your admin created.

- Enter your email and password, then tap “Sign in to CROS”.
- Switch the interface language any time with the EN / toggle (top-right).
- Your role (CRE, Head, or Admin) decides which tabs you can see.
- Change your password after first login (Admin can reset it for you).

2. Daily Workbook - KPIs

Your day on one screen. KPIs marked “Auto” are filled from WooCommerce and your worklist taps; you only type what is genuinely manual.

- Pick the date at the top; the day is pre-filled from sync + worklist actions.
- Auto KPIs show a green “Auto” tag - tap the number to override, then “revert” to restore.
- Tick check-type KPIs (e.g., “Tip of the Day Posted”); type counts where needed.
- Fill Achievement / Issues / Commitment; everything auto-saves on blur.
- Progress bars show tasks done and KPIs filled. Tap “Submit” when done.

3. Daily Workbook - Tasks, Social & Notes

The Tasks tab is your daily checklist; Social tracks follower counts; Notes holds free text.

- Tap any task to mark it done - the progress bar updates instantly.
- On the Social tab, enter yesterday/today counts; the change is computed for you.
- Tasks and channels are configured by your admin, so the list stays current.

4. Order Worklist - one-tap actions

The heart of the system. Each morning the day's WooCommerce orders appear here. Working the list updates your KPI counts automatically - no typing.

- Tap “Contacted”, “Review requested”, “Unboxing requested”, or “Testimonial requested” per order.
- Each tap turns green and increments the matching KPI on your workbook.
- Search by order # or customer; filter by order status.
- Tap “Log complaint” to raise a complaint pre-linked to that order.

5. Complaints

Track every customer complaint from Open to Resolved. Logging one automatically feeds the complaint KPIs.

- Filter by status (All / Open / In progress / Resolved).
- Tap “Manage” to change status, set a follow-up date, or add resolution notes.
- CREs see complaints they logged; Heads/Admin see all and can assign owners.

6. Logging a complaint

Capture a complaint in seconds. Linking a Woo order is optional but helps tracking.

- Enter customer name (pre-filled when opened from the worklist).
- Pick a category (Warranty / Defect / Delivery / Product / Other).
- Start typing an order # or customer to search and link a Woo order.
- Describe the issue and save - it appears in the Complaints list immediately.

The screenshot shows the 'New complaint' form within the VIKAS TOOL MART CRE Daily Workbook app. The app's header is yellow and contains the logo, title, language toggle (EN), and a 'Log out' button. The form itself is dark-themed and includes the following fields:

- CUSTOMER NAME**: A text input field.
- PHONE**: A text input field.
- CATEGORY**: A dropdown menu currently set to 'WARRANTY'.
- ORDER # (OPTIONAL)**: A text input field with the placeholder 'Search order # or customer'.
- DESCRIPTION**: A large text area for describing the issue.

At the bottom of the form are two buttons: 'New complaint' (yellow) and 'Cancel' (grey). The bottom navigation bar of the app shows four icons: 'Workbook', 'Worklist', 'Complaints' (highlighted in yellow), and 'Reports'.

7. Reports & Export

Download an auto-compiled report of your day as PDF or Excel.

- Choose “Daily report” and the date.
- Tap “Download PDF” or “Download Excel”.
- Heads/Admin can also export a management summary over a date range.

8. Management Dashboard

A trustworthy, real-time view for leadership. Every metric is tagged Auto (from the store/system) or Manual.

- Switch the range: Today / Week / Month, or pick a custom range.
- Read avg rating, reviews, complaints open vs resolved, new vs repeat customers, follower growth.
- The reviews chart shows on-site reviews per day.
- The CRE Accountability table shows who submitted, task %, and KPIs filled.
- A banner appears if the last sync failed - data stays available regardless.

9. Admin overview

Everything configurable lives here - no developer needed.

- Manage Users, WooCommerce, KPIs, Tasks, and Social channels from one place.

10. User management

Create staff accounts and control access.

- Add a user with a role (Admin / Head / CRE), department, and temporary password.
- Edit roles, deactivate accounts, or reset passwords.
- Set each user's default language (English or Tamil).

11. WooCommerce settings & sync

Connect the live store using read-only API keys. Keys are encrypted and never shown again.

- Enter the store URL + consumer key/secret (WooCommerce ' Settings ' Advanced ' REST API, Read permission).
- Tap “Test connection”, then “Save”.
- Use “Sync now” for an immediate pull; the worker also syncs on the schedule (cron).
- Google reviews stay manual in Phase 1 (auto-pull is a future upgrade).

The screenshot shows the 'WooCommerce' settings screen within the 'VIKAS TOOL MART CROS Daily Workbook' app. The top header is yellow with the app logo, name, and user 'Uma Jagadeesh (MD) - ADMIN - Leadership'. A 'Log out' button is in the top right. The main settings area is dark grey and contains the following fields:

- STORE URL:** A text field containing 'https://vikastoolmart.com'.
- CONSUMER KEY:** A text field containing 'ck_...'.
- CONSUMER SECRET:** A text field containing 'cs_...'.
- SYNC SCHEDULE (CRON):** A text field containing '30 6 * * *'.
- REVIEW SOURCE:** A dropdown menu set to 'WooCommerce'.
- Google reviews auto-pull:** A toggle switch currently set to 'DISABLED'.

Below the settings fields are two buttons: 'Save settings' (yellow) and 'Test connection' (grey). A status bar at the bottom shows navigation icons for Workbook, Worklist, Complaints, Dashboard, Reports, and Admin (highlighted).

At the top of the settings area, there is a 'Sync now' button and a status indicator 'Last sync: 7h ago (OK)'. A note at the bottom of the settings area states: 'Keys are stored encrypted (AES-256-GCM) and never displayed again. Generate read-only keys in WooCommerce → Settings → Advanced → REST API.'

12. Configure KPIs (and Tasks / Channels)

Tailor the workbook to how VTM works - add, edit, reorder, or disable items without code.

- Add a KPI with EN/TA labels, type, target, and unit.
- Set an auto source (e.g., new customers, worklist contacted) or leave it manual.
- Reorder with ' / " ; toggle Off to hide without deleting.
- Tasks and Social channels are managed the same way.
